## John Bell Brings Home Silver Quoit

Trophy of Championship Matches of Western Canada Quoiting  
Ass'n. Will Rest at Coleman Till Next Meet

"Jock" Bell made a triumphant return to Coleman last Saturday morning, bringing the famous silver quoit, from the Baill Highland Festival, which he won from last year's champion, W. A. Carmichael, of Victoria Quoiting Club, Calgary.

Piper Alan Penman, of Hillcrest, and a number of friends, with Mrs. Bell, and his brother, Will Bell, gave the new champion an enthusiastic reception as he stepped off the train, and the silver quoit was proudly carried from the station to the Grand Union hotel by W. Roughside, with the pipes playing the party up town.

The quoit has an interesting history. It was brought from Scotland twenty years ago, and it bears an inscription on a silver plate, as follows:

Johnnie Durnie's Quoit

"At Rest"

He defeated the Scottish Champion Robert Kirkwood  
at Spring-side, Ayrshire, Scotland  
July 27, 1908

This old scarred and worn quoit of Johnnie Durnie's is covered with the silver casing, which lifts off, displaying the quoit used by Durnie in many a doubtful battle for championship honors. On the silver casing the following names are engraved: W. A. Carmichael 1926, T. Pearson 1927, A. Rankin Jr. 1928, John Bell, Coleman 1928.

In addition to the quoit, which the champion holds till he is defeated, a handsome silver tray was presented by the Western Canada Quoiting Association to Mr. Bell.

## Steve Leosky Leaves for Old Home in Europe

Coming to Fernie in 1905 from the country which is now Czechoslovakia, and to Coleman in 1906, where he has since lived, Steve Leosky, of the firm of Leosky, Leclieu & Co., left on Saturday night for his old home, by way of New York, whence he will sail by the White Star Line to Le Havre and proceed to visit his father, who has been in poor health for some time.

Mr. Leosky formerly worked in the mines at Fernie and Coleman, and later worked for other storekeepers in town, till he entered into partnership under the present name. The firm has seen a steady increase in business, formerly occupying premises opposite the Empire hotel, and two years ago moving to larger quarters in the building formerly occupied by C. S. Quimby.

After several months' visit in his old homeland, Mr. Leosky will return to Coleman.

Rumor has it that Bob Penman has issued a challenge to the newly crowned quoiting champion, John Bell.

## Several Complaints of Midnight Prowlers

Complaints have been made to the police during the past week of robberies and attempted house breaking. Jack Nash reported that early on Sunday morning an attempt was made to enter his place, the key on the inside of the back door having been pushed out of the keyhole, and the door unlocked from the outside. The first attempt was made about 2 a.m., and a second attempt about 5 a.m., but no glimpse of the intruder was obtained.

The same night or early morning the house of Mr. Sudworth, east of the hospital, was visited where similar tactics were employed, but no entry was effected.

The house of Wm. Evans, Main street, was also visited, Jimmy Evans, his son, being awakened by someone attempting to gain entry through a window, but the would-be burglar escaped as soon as Jimmy made an attempt to discover what was wrong.

H. Rayfield, who rooms at the Grand Union hotel, reported that one night last week his room was entered, and he caught sight of a fellow retreating down the hall, making his exit by the fire escape which is at the rear of the hotel, leading down to the lane.

A box car of the C.P.R. was found to have had the seals broken, and some goods belonging to the P. Burns Co. Ltd., were missing.

One house reported the theft of a small sum of money that night.

Constable Houghton states that four suspicious men left town early on Sunday, and were at the Coleman Cafe about daybreak.

## Practical Method of Religious Instruction

Illustrated Addresses on "Pilgrim's Progress" Delighted Children During Past Week

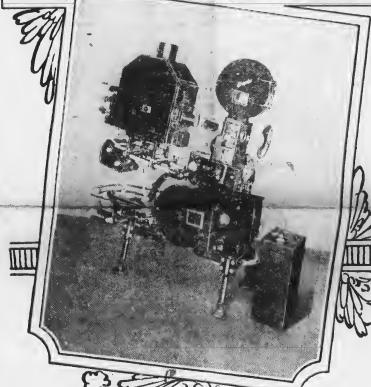

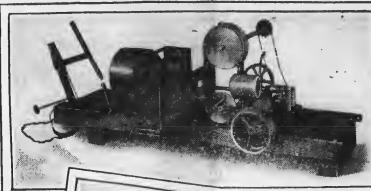

A series of meetings for children held by C. C. Bowen and J. M. Fairholme of Vancouver, came to a close on Sunday evening, the subject being illustrated addresses on "Pilgrim's Progress," which continued through the week. This practical method of giving the children religious instruction proved very popular, and many adults attended, the Knights of Pythias hall, in which the meetings were held, being filled every evening.

Mr. Bowen has a specially built car in which he travels, containing office facilities and sleeping accommodation, and every summer he visits mining towns and lumber camps in British Columbia and Alberta, carrying on his good work. Formerly a soldier in the Imperial Army, serving during the war, and later a Salvation Army officer, he decided to engage in his present work on his own initiative, and a number of his friends contribute to the financial necessities of his mission, which is non-denominational. He promised the children that he would if possible visit Coleman again next spring.

A relic of Prohibition days—The police barrier at West Coleman where all cars coming from British Columbia were examined to find if they were carrying intoxicating liquor.

## Yesterday and Today

3000

Thirty-five years ago the sixth of June last, in a jeweller's shop in a small town across the border, a young U.S. Government clerk, C. Francis Jenkins, using the machine pictured above, which he had just invented, staged the first public exhibition of moving pictures in America.

It remained, however, for the telephone engineer and the scientist, trained in the electrical trans-

mission of sound, to make possible Sound picture equipment.

Apparatus similar in all respects to that which has already been installed by the American electric engineers in the leading theatres from coast to coast throughout Canada, has also been placed in large theatres in Australia, France, Germany, India, Australia, New Zealand, Brazil, West Indies, Central America, China, Japan, and some 2,500 in the United States.

## Improvements at McBurney's

This popular drug store is being improved by a stucco front and re-decorating, work having started on Monday, when the foundation was "tred up," which necessitated the temporary removal of the plate glass windows. It will add very materially to the appearance of the store.

Joy Emerson left on Sunday to commence studies at Mount Royal College, Calgary, her parents driving up by car. Douglas Bevan, also a student of Coleman high school, left by train on Sunday evening to commence the Fall term.

## Heard On The Corner

That the visit of Bill McGrath to Turner Valley has nothing to do with the slumping oil stocks this week.

Billy Evans telling the boys that the bull trout should be taken out of the "cricks" because they are eating up the small fish and becoming very lazy.

Strange noises as if someone was choking, but which proved to be Jimmy Taylor rehearsing the toot to the haggis.

That Bill Roughend and Jim Duncan have gone on a prospecting trip.

## "Submarine" at The Palace

For a real thriller of the sea, "Submarine," in which scenes are shown of the rescue of the crew of the S44, which was rammed and sunk by the "Falcon" during naval maneuvers.

An impression of the experience of the trapped crew may be gained from the following:

"Finally we heard a tap. Oh, joy, that was certainly something to live for. Then another tap. By God, and still another. Then we lost it. I guess, Diver Dorgan, not getting any response to his signals from us, proceeded aft. Then he came back, because he tapped again.

"We were all pretty much exhausted, but when we heard the tap this time, the commander grabbed a metal bar and answered the knock. Then we heard the message:

"Hold everything—an attacking air line."

## Road Surfacing Work Under Way

"Bitumals" Will Be Given Severe Test on Busiest Corner of Town

Main street is busy this morning, about a dozen men are working, and from 50 to 100 are watching them. The attraction is the laying of the new surfacing material known as "Bitumal." The power grader is at work, men are rolling kegs of Bitumal from the town hall, Chiel Houghton is directing operations, and the bystanders are engaged in the great outdoor sport of expressing their opinions about the whole thing. Main street has not been so busy for many a moon, and all four corners are splendid points of vantage from which gentlemen of leisure may view the proceedings.

To vary the proceedings, a dog fight occasionally occurs, which furnishes a diversion from the main topic of discussion, and there is no doubt that this corner will prove the centre of attraction as long as the work lasts. It is a pleasant change to note the activity prevailing.

## K. of P. Hall Being "Dolled Up"

Interior and Exterior Being Renovated During Slack Time at Mines

Turning quiet times to good account, members of the Knights of Pythias hall are engaged in painting the exterior, while inside carpenters have been busy improving it, in preparation for the winter's activities. The outside is to be painted in cream and brown colors, which will greatly improve the appearance of this central corner of the town, and give a touch of prosperity, even though business may be slack owing to the mines being in part time and the International closed for two weeks.

## Surprised Forest Ranger Removed

G. G. Coote, M. P., Takes Up Matter With Department of the Interior

With the removal of one of the forest rangers from this district during the recent dangerous fire, a letter was written to the Federal member for this district, Mr. Coote, who replies as follows: to H. T. Halliwel, president of the Board of Trade:

"I beg to acknowledge receipt of your letter of Aug. 29, with reference to the protection of our forests from fire.

"I am surprised to hear that one of the forest rangers has been moved from your district and am forwarding your letter to the Deputy Minister of the Department of the Interior with a suggestion that the number of rangers in this forest reserve should be increased.

"I can assure you that I will be glad to do all I can to secure whatever action is necessary by the government for the preservation of our forests."

"Thanking you for your action in writing me regarding this matter, I am,

Yours very truly,

G. G. Coote

## Local News

George Diffield and Wm. McGrath motored to Turner Valley Diffield—on Sunday.

Mr. and Mrs. W. G. Scott of Coaldale invited to Coleman on Sunday evening and are the guests of Mrs. V. C. C.

Mr. Fisher was awarded first prize in Farley Work at Bellevue exhibition, and Mrs. Bell, etc., second prize.

Mr. F. G. Graham and daughter, Mrs. S. MacInnis, are at present staying with Mrs. Charlie Graham, at Lacombe, the latter being ill with a severe attack of tonsillitis.

Ask your grocer for "Milkmaid" bread, made in Coleman. Originality is unexcelled, and you help to develop local business in asking your grocer for "MILKMAID."

George Reed was highly pleased in being among the prize-winners at Bellevue exhibition. He exhibited some poultry, it being the first time he has entered an exhibit, and won a first prize.

Among those who attended the Highland festival at Baillie were Mr. and Mrs. George Kellock, Mr. and Mrs. Alex. M. Morrison, Mr. and Mrs. A. Dewar and daughter Evelyne, Mr. and Mrs. Jack McDonald, and D. O. Mackie.

The K. of P. members and their friends held an enjoyable whisky drive and dance last Saturday evening, when the prizes for what were won up Mrs. E. Hill, Mrs. Derbyshire, Robert Jenkins and J. McArtney. The regular series will be held, which will provide the members with pleasant recreation.

## Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen: Hon. J. H. Thomas, Minister of Employment in the Ramsey MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer; and Mr. Asquith, former Minister for the Dominions. Mr. Churchill and Mr. Asquith are in Canada today, but they are none the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibilities of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is made in his official capacity as Minister of Employment with the object of endeavoring to find out in what ways Canada can assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, or evolved, ways and means to accomplish this object, to secure the co-operation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers if British unemployed would be transferred to this Dominion. Anxious as Canada may be to have a large proportion of its incoming settlers of British birth, this Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention; on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration are, he says, two quite separate and distinct problems and should be tackled as such.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with, and the sympathetic support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases by British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He has sat down in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy. He has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us, rather than from others."

This should appeal to the people of Canada as good business. It is a self-sacrificing proposal on both parts to it. For example, Mr. Thomas points out that Canada imports over 16,000,000 tons of coal from the United States, and wants, and says he is going to get, some of that coal business for Britain. Canada's heat currency,—and thereby assist the coal mining industry of the Old Land and supply work for some of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British dock hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will strike a responsive chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariff, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion to pursue is to offset tariff action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchase that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

## Silver Dollar Out Of Date

Fifty Million In U.S. Treasury But No Demand For Them

The silver dollar has joined the horse and buggy in the annals of history. The value of the past dollar has faded from circulation, while the silver half-dollar is still used in the West, but is going out of use in the East, because quarters are favored for tipping, according to U.S. Treasury officials.

At the present time there are about 50,000,000 silver dollars tied up in the Treasury, to back up all

silver certificates, although they could easily be placed in circulation if there were a demand for them.

## New Car For King George

Has Six Wheels and Will Travel Over Roughest Roads

A six-wheel motor car built to go anywhere on land has been delivered to the King at Sandringham, Norfolk. It is an all-British production designed to travel over the roughest moors and broken ground and even over ploughed land, while it can travel at 60 miles an hour on the open road. The car has detachable rubber caterpillar treads ready for rough ground.

The proposed canal across Nicaragua, to link the Atlantic and Pacific, would be bigger than the Panama Canal.

A new type of lifeboat, recently built in British waters, holds 300 passengers and is equipped with radio.

Any job is easy when you like it and hard when you dislike it.

## Was Victim Of Glacier

Body Of Austrian Recovered After Eighty-Three Years

Eighty-three years ago, Norbert Mattersberger, at the time 32 years old, husband of Magda, and father of Franz Otto, failed to return to his cottage, in the village of Kals, Austria, one day during the woods, while on his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Mattersberger came home just as he left that day in 1848. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Franz Mattersberger is now 88. His father was buried at Kals, while grandchildren and great-grandchildren mourned at his grave.

## WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down,

When a girl grows languid, dull and irritable, when her color fades and she becomes pale, you may be sure that the cause is anemia, or inveterated blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nourishment from the blood to every tissue. They also cause the skin to glow healthy. When a girl's blood is deficient in these red corpuscles her body is under-nourished, her nerves starved, and there is serious danger of a collapse. What causes this improvement in the quality of the blood, and it is a scientific fact that a course of Dr. William Pink Pills will do this. It is also known that all traces of anemia and its accompanying weaknesses will disappear.

As evidence of the value of Dr. William Pink Pills in cases like this, Mrs. E. M. Howland, of Howland Station, P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly depressed condition, with a pale face, and much under weight. We tried several medicines, but they did not help her health, so I gave her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained in weight, had quite improved and she was better color. Her complexion, in fact she had fully regained her former good health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills. You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

## World Harvest Larger

Wheat Acreage in Many Countries Increased in Last Year

Present indications are that the world acreage of wheat to be harvested in the season 1929-30 will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five million acres larger than in 1928. Areas reported in all European countries total 56,562,000 acres, an increase of 1.4 per cent. over last year.

Worms in children work havoc. These pests attack the tender lining of the intestines and stomach, and unless completely disturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the intestinal surface. Miller's Worm Powder will only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Chinese writers state that in the third century B.C. China had wide highways lined with shade trees at intervals of thirty feet.

An Indian spider's web, only six inches wide, was found to contain over 41,000 meshes.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

Several Canadians Also Received Honorary Degree At Dalhousie University

America's minister to Canada, Hon. William Phillips, and Canada's minister to the United States, Hon. C. Massey, were among those receiving honorary degrees at Dalhousie University's re-union convocation. Other distinguished men to be honored were Hon. E. N. Rhodes, P.C., Premier of Nova Scotia; Hon. A. K. MacLean, president of the Exchequer Court of Canada; Col. the Hon. J. L. Ralston, Minister of National Defence, and Chief Justice A. M. Morrison, of the Supreme Court of British Columbia.

Keep Foods Deliciously Fresh

With Manufacture Briquettes From Dried Coal In Souris District

The Canadian Coal Briquette & Power, Ltd., has been organized by a number of prominent financiers and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District of southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The Company, it is stated, owns 800 acres of coal in the Souris District with an estimated tonnage of 8,000,000 tons.

Miss Oldsiver: If I should lose all my money would you love me just the same?

Mr. Seadhunter: Just the same, my dear, only I'd be so busy earning my living you wouldn't be able to notice it.

Kill that corn with Minard's Liniment.

## Wonderful Discovery Of German Experts

Treatment Given To Living Trees Makes Lumber Fireproof

A thin mineral soap, fed to living trees to make their wood partly fireproof after it has been cut and made into boards, has been invented by experts of the College of Forestry, at Tharandt, Germany. The process is a modification of one invented some time ago to dye the wood or a living tree to any desired colour. For this purpose solutions of the desired dyes were put into holes bored in the tree close to the ground. As the soap dye went with it, gradually colouring the wood. In the new fireproof process, the dye solution is replaced by a bowl of the "soap," containing a composition of silicon and fluorine and other chemical elements, so arranged that the solution flows little by little into a hole bored in the tree trunk. As with the dye solution, these chemicals are absorbed slowly by the tree and carried up by the rising sap into every fibre of the wood. The solution is too diluted to damage the living cells of the tree. Instead, its chemicals are gradually converted into mineral deposits throughout the wood, such as happens in the course of millions of years to wood buried in mineralized ground and slowly turned into stony fossil. To carry this mineralizing process too far in the trees intended for timber is unwise, since the mineral deposits make the wood harder to saw. The German experts claim to have succeeded, however, in mineralizing trees just enough to make their wood almost fireproof without destroying its properties as wood.

## Might Be Good Idea

Everyone In Japan Compelled To Carry Identification Disc

"Where's your identification disc?"

In the near future you may be stopped by a policeman and asked this question. And if you can't produce the disc, it may mean a police court summons and a fine says a writer in Answers. This may sound far-fetched, but a coroner remarked the other day that it would be a good thing if everybody carried an identification disc of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone wears such a disc around the neck from birth onwards. Apart from the convenience in accident cases, it would also be a safeguard against loss of memory, of which there have been many instances.

Since Free Birth—There are

many who have been afflicted with

sore eyes and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this ointment regularly, as there is nothing like it.

Two Diplomats Honored

Several Canadians Also Received Honorary Degree At Dalhousie University

America's minister to Canada, Hon. William Phillips, and Canada's minister to the United States, Hon. C. Massey, were among those receiving honorary degrees at Dalhousie University's re-union convocation. Other distinguished men to be honored were Hon. E. N. Rhodes, P.C., Premier of Nova Scotia; Hon. A. K. MacLean, president of the Exchequer Court of Canada; Col. the Hon. J. L. Ralston, Minister of National Defence, and Chief Justice A. M. Morrison, of the Supreme Court of British Columbia.

# GREAT BRITAIN'S FOREIGN POLICY ONE OF PEACE

**Victoria.—Great Britain's foreign policy has never been one of subservience to France, but one for the preservation of peace in Europe.** Rt. Hon. Winston Churchill, former chancellor of the exchequer and the Baldwin Government, declared here.

He was addressing a luncheon given in his honor, where nearly 1,000 persons greeted him enthusiastically. The gathering was sponsored by the Canadian Club and National Council of Education.

He had gathered, said Mr. Churchill, that there had been tendencies to misrepresent the foreign policy of which he spoke. Britain had ever recognized, he recalled, that reconciliation between France and Germany was the primary objective of European diplomats and leaders. All other problems were of lesser importance. Through the Treaty of London the bringing of these two nations into closer comradeship had been attained.

"We have always been anxious that Germany should resume her place in the family of Europe, and that has been achieved. Not that we did that at the expense of the allies with whom we stood side by side during those long war years," he said. "Our policy in Europe has been clear, keen, and consistent."

Britain had very old and highly valued associations with Japan, he said, dealing with the policy in the east. He had always found his confidence in the government of Japan strengthened by all its conduct.

In broadening the Anglo-Japanese alliance at Washington to include the United States, the Pacific ocean had been placed in a position of security that did not belie its name.

"I think you will agree the British policy in China has been successful," he declared, pointing out that a very difficult period had been passed through and consolidation was now in sight.

## Reduce Running Time

**Canadian National To Consider Matter Of Increasing Speed From Montreal To Vancouver**

Winnipeg, Man.—Immediate consideration is being given the matter of cutting the running time of Canadian National trains from Montreal to Vancouver in conformity with the proposed cut of 10 hours for transcontinental trains by the Canadian Pacific, as recently announced by President Beatty, according to a statement made by Sir Henry Thornton, K.B.E., president of the Canadian National Railways, just prior to the departure for Montreal.

The president who was accompanied by Lady Thornton, left the Canadian train for the west. This marks the conclusion of Sir Henry's annual tour of western lines, in the course of which, he said, he had once more had occasion to note with admiration the optimism of Canadians in the west under trying circumstances.

He referred to the adverse crop conditions. While a national disaster had been narrowly averted, the morale of the westerner had not been affected. Nor had the faith of the Canadian National in the west, he added, stating that the plans for expansion which had been in progress would be continued while new ones were being considered.

## Valuation Of Beech Property

**Holdings Of Pioneer Homesteader At Fort Churchill Are Appraised**

The Pass, Man.—The heirs of the late Capt. William Beech, pioneer homesteader at Fort Churchill, accompanied by their solicitors have arrived from the Hudson Bay port. The party had gone north to obtain an expert valuation of the property, which is now the subject of exchequer court proceedings.

Nothing was divulged in regard to the valuation placed on the 2000 odd acres held by the Beech family at Churchill.

The case will come before a court hearing in Winnipeg about the end of the month.

### Boat Strikes Whale

Yarmouth, N.S.—Striking a 50-foot whale miles southwest of Yarmouth Cape, the steamer "Yarmouth" only freed itself an hour later by stopping and backing away from the huge mammal.

From 1885 to 1927 there were 4,266 lynchings in the United States.

W. N. U. 1802

## Big Aviation Event

**Important Race For Aviators May Be Held In Canada**

Toronto.—The rapid development of air navigation in Canada during the past few years promises to culminate in an aviation event in this country which, it is expected here, will rival in importance the race for the Schneider cup, now the international classic of Europe.

In view of the fact, as a result of the increasing interest in the war, Canada numbers a considerable body of expert air navigators, and in view of the inevitable tendency towards international air meets, C. O. Stillman, president of the Imperial Oil Company, has made an informal announcement to the effect that his company contemplates a contribution of \$50,000 for the purpose of promoting an international race to be called "The Imperial Air Derby." This race will begin at some prominent flying centre in the United States, and end at a Canadian field, the date next year to be announced later.

The amount suggested as prizes is said to be far in excess of any announcement yet offered on this continent for an air race, and it is bound to attract the premier pilots and the most modern machines not only of Canada and the United States, but of other countries.

## Western Air Mail

**Service Expected To Commence About October First**

Ottawa.—Inauguration of 1,250 miles of air mail service on the prairies is expected about Oct. 1, linking Winnipeg with Camrose, Alta., and thereby saving a day's time between the two points. G. Herring, chief superintendent of the Dominion Air Mail Service, is now in the west making arrangements with the Western Canada Airways Company, of Winnipeg, while Hon. P. J. Veniot, postmaster-general, plans to go to Winnipeg to officiate at the formal opening of the service.

There are two routes planned for daily service, it was learned at the postmaster-general's department, one from Winnipeg via Regina, Moose Jaw, Calgary and Camrose, and the other from Regina via Saskatoon and North Battleford to Edmonton.

For the first year, it is indicated, the air mail service will likely be established across the Rockies to the Pacific Coast, giving practically a Dominion-wide air mail service from Rimouski in the Gulf of St. Lawrence and the arrival of ships from Europe.

## Canada's National Parks

**American Visitor Thinks Parks Of British Columbia Ahead Of Those In United States**

Washington.—A trip through the Canadian Rocky Mountain National Park has convinced Mayor Ralph Bauer, of Lynn, Mass., that the management and upkeep of the Canadian Columbia park is far ahead of the American National Parks, which he also toured. He has written a letter to Senator David I. Walsh, to that effect, and the senator has asked the national park service to investigate.

Major Bauer stated that the Canadian roads were better made, and wider and were well oiled. There was no charge for admittance and the whole reservation seemed to be run for the people to whom it belongs rather than for concessionaires "in an effort to bleed the people to the last dollar possible."

### Milk Shortage In Ontario

Toronto, Ont.—Dry weather may bring a milk shortage in Ontario, according to George H. Barr, provincial dairying director. Toronto milk dealers have announced an advance in price of one cent a quart. John Carroll, of the Department of Agriculture, states that heavy crop losses may be the result, from the most extreme spell in years.

### Grows Apples In Saskatoon

Saskatoon, Sask.—Apples that compare favorably in size and taste with those grown in British Columbia, have been produced this year in Saskatoon. George Pow, of this city, has a two-year-old tree that produced more than 400 good-looking Blushed Caville apples. He also grows cherries and plums in his back yard.

### Java Sugar Arrives

Montreal.—With the first shipment of sugar from Java for Canada, in at least 20 years, the S.S. Clan Seabrook arrived at Montreal with 73,000 bags from Tjilatjap, on the south coast of Java. The steamer made the journey in 48 days, sailing from Tjilatjap on July 13.

## British Settlers For Coast Province

**VETERAN NEWSPAPERMAN**

\$400,000,000 Is Received For Purpose Of Facilitating Plan

London, Eng.—The required sum of \$400,000,000 for the establishment of the Empire Development Corporation is assured, according to an assertion by Dr. C. T. Calbraith, in London newspapers recently—an assertion that is causing much rejoicing in official quarters. Dr. Calbraith is here in connection with the movement of settlers from the Old Country to British Columbia.

Dr. Calbraith says it is proposed that the corporation should acquire 20,000,000 acres in British Columbia and settle thereon 20,000 British families.

Premier Tolmie has requested Mr. Thomas to send a representative to British Columbia; he declared, "and I am only waiting the approval of the scheme by Premier MacDonald, Lord Passfield, Mr. Thomas and Premier Tolmie."

It is proposed that the governments of Britain and British Columbia should have representatives on advisory boards and that British and Canadian trades unions also will have representatives. Opportunities to co-operate would be offered to organizations carrying on empire settlement operations."

## CANADA TAKES IMPORTANT STEP AT WORLD COURT

**Genève.—Canada is first among the British Dominions formally to declare adhesion to the optional clause of the world court, which provides for compulsory arbitration of international disputes.**

Cheers rang through the Hall of Reformation when Senator Raoul Dandurand, leader of the Canadian delegation, made this declaration to the tenth assembly of the League of Nations. As he left the tribune, the premiers of both Great Britain and France joined with those offering congratulations.

From Senator Dandurand's statement it was clear that the Canadian declaration did not come as a result of the recent discussion between delegates of the Dominions and Great Britain, or in consequence of Premier Ramsay MacDonald's similar declaration in behalf of Britain. Since the day Premier Mackenzie King, of Canada, sent the League his statement of March 10, 1925, that the Canadian Government was prepared to accept compulsory jurisdiction of the Court of International Justice in justifiable disputes, Canada has never failed to support the association's convention city for 1930.

## Gardiner Government Goes Down To Defeat

**Remarkable Political Situation In Saskatchewan Ends With Want Of Confidence Vote**

Regina.—The Liberal Government in Saskatchewan after a tenure of 24 years, went down to defeat on the floor of the Legislature on a vote of want of confidence. The defeat was brought about by the elected representatives of the people. Conservatives, Progressives and Independents joined together on the want of confidence vote.

The official count of the vote was:

Opposition, 34; Government, 27. Only one member of the House was absent when the vote was taken, namely, D. A. Hall, the Liberal member for Cumberland.

Mr. Gardner closed the debate on

the want of confidence motion on the part of the Conservatives, and was followed by E. S. Whatley, Progressive member for Kindersley, who made a short statement indicating the attitude of the Progressive members on the constitutional issues raised, and that they intended to support the motion.

A. C. Stewart, Independent member for Yorkton, followed Mr. Whatley, and stated that the Independent group would also vote for the amendment.

No member of the Conservative group spoke on the amendment, and at the conclusion of Mr. Stewart's speech the Speaker called for the vote.

## Infantile Paralysis In East

**Quebec Schools Delay Opening On Account Of Outbreak**

Quebec.—Due to the outbreak of infantile paralysis in this district, it was decided by the Protestant Board of School Commissioners to postpone the opening of schools until Sept. 16. Schools in this city generally open the first week in September.

Dr. Alphonse Lessard, director of the provincial hygiene department, announced that the department was not in a position to supply convalescent serum to combat the disease, but in the event of urgent need would endeavor to secure a supply

## GOOD PROGRESS IS SHOWN IN GARNERING CROP

**Ottawa—Crop reports received from the three prairie provinces indicate excellent progress in the harvesting of the wheat crop. The bulletin issued by the Dominion Bureau of Statistics contains reports from the agriculture departments of Manitoba, Saskatchewan and Alberta.**

The crop is practically all cut in southern Manitoba, and threshing is about 50 per cent. done in that part of the province.

A few fields still stand in the north. Splendid progress has been made with harvesting in Saskatchewan. Ninety per cent. of the wheat in the growing districts, where the growers, unable to find home markets, were sending carloads of fruit to the United States on consignment—will be taken to price.

### Commander Byrd Unveils Portrait

Los Angeles, Calif.—A radio broadcast by Commander Richard E. Byrd, from his Antarctic camp at Little America, blew an automobile horn and drew curtains from an enlarged picture of Byrd at the Seventh National Radio exposition here.

## Eighteen Day Trail Ride

The remote Columbia Ice Fields, north of Lake Louise, was the objective this year of the major Trail Ride of the year. These fields are claimed to be the largest body of ice south of the Arctic Circle, covering 266 square miles in area, where waters flow in to three oceans. Only experienced trail riders are permitted to take this strenuous trip for which they must possess at least the silver button emblematic of 100 miles of trail riding. The trip from start to finish took eighteen days to complete. Picture shows two of the hardy trail riders, W. L. Payne, London, England, and Louis Prevost, of Montreal with Guy Thomas, Brewster's guide, on right, together with a section of the Columbia Ice Fields.

## THE SITUATION IN PALESTINE IS MORE SERIOUS

**Jerusalem—Moslem Arabs throughout the Holy Land and the bordering states are being called upon by highly inflammatory propaganda to revolt and move against the government of Palestine.**

Floods of this propaganda material were said to have emanated from Jaffa, Haifa, Egypt, Damascus, Beirut and Aleppo and have been instrumental in the smoldering of renewed discontent which some regard as portentous.

One of the proclamations in circulation among the Arabs heralded a "holy war" and called upon all Arabs to help Arab insurgents in Palestine, whose condition was described in the blackest terms.

Although Jerusalem was quiet, British troops continued their incessant clashes with bands of tribesmen who have penetrated the Palestine borders.

Reports persisted, despite official denials, that skirmishes with Bedouins have occurred near Beersheba, in which six native Christians have been killed.

Jews, who hold the first proclamation of the high commissioner, Sir John Chancellor, as aiding and abetting their cause, were not so joyful over a second proclamation by the high commissioner, which announced constitution of special courts presided over by British judges to try the criminal cases among both Jews and Arabs, growing out of the recent disturbances.

London.—The situation in Palestine continues grave in communities where no troops have been sent, according to advice received by the Exchange Telegraph agent at Cairo. Aeroplanes have landed five and wounded 20 at Nablus.

At Haifa Jewish shops are still closed. The situation is calm, however, and people are returning work. Curfew regulations are maintained and troops patrol the streets nightly.

Jews and Arabs are boycotting each other. The Anglo-Palestine Bank, which is Jewish, refused bills of credit to Arabs while Arabs are boycotting the Rutenberg electric company and the Jewish bank.

Following the repulse of Bedouin tribesmen by the British at Safad and Samakh, 80 wounded have arrived at Haifa. Aeroplanes have repulsed Arab forces endeavoring to attack Tiberias, and Arab losses are believed to be heavy.

## Would Ask For Assurance

**Premier MacDonald Should Have No Political Worries When He Visits States**

London, Eng.—Discussing Premier Ramsay MacDonald's statement at Geneva, that the home parliamentarian situation might possibly interfere with his trip to Washington, the Liberal newspaper, the Star, suggests editorially that opposition leaders give the Premier, before he leaves, firm assurance that the exigencies he fears will not arise and that when he goes to Washington it will not be as the leader of the Labor Government, but as the spokesman of the whole nation on the vital issues concerned.

Speaking of the possibility of his trip, the Premier pointed out the difficulty of the leader of a party without a clear majority being out of the country while parliament was sitting.

## Returns From Arctic Trip

**Steamer Beothic Back From Eight Thousand Mile Voyage**

North Sydney, N.S.—The sealer "Beothic" from back from eight thousand miles, and six weeks of threading the eastern archipelago of Canada's Arctic sea, arrived here recently. Scientists and men in charge of their discoveries in the north, welfare workers among the Eskimos, and members of the Canadian Mounted Police, back to civilization from their world's loneliest beat, were on deck when the Department of the Interior's all-purpose supply boat docked here.

Among them is J. D. Soper, Canadian government naturalist, bringing with him to Ottawa the first blue goose ever seen by man.

### Invitation For Ramsay MacDonald

Washington.—The American Federation of Labor will invite Premier Ramsay MacDonald to attend its 49th annual convention at Toronto, which begins on October 7, if it is found convenient for Mr. MacDonald to do so.

## Internal Brakes Effortless Steering Superb Roadability

### POSITIVE BRAKING

IT'S no effort at all to drive Pontiac. It has the BIG SIX ease of control for which motorists used to pay double the price of Pontiac Six. Built low, equipped with four Lovejoy Shock Absorbers. Pontiac holds the road surely and easily at all speeds.

### EASY STEERING

Steering, in the Pontiac Big Six, has been robbed of all strain and effort. You can relax at the wheel. And, when you want to stop, you have the comforting assurance of the finest, four-wheel, internal-expanding braking system on any car within hundreds of dollars of Pontiac price... and an independent emergency brake that operates at rear of the transmission.

### HUGS THE ROAD

Compare Pontiac Big Six, point by point, with ANY other car in its price-range. Check it for beauty, performance, comfort, ease of control, dependability. And remember, Pontiac is a long-life car, always sure of a high resale value, even after years of trouble-free service.

THURSDAY, SEPT. 12, 1929

### NOTES AND COMMENTS

A mysterious "Mr. Raffles" has caused some concern among householders by his nocturnal prowlings and entries into various places. From reports received, it would appear that his purpose is to alarm inmates of houses, for robbery is reported from his visits, so that possibly it may be some demented individual who has a mania for alarming people, an aggravated form of the practical joker. The danger of such visits is that he may stumble into someone who will pull the trigger of a gun.

Coleman Light & Water Co. is spending approximately \$10,000 this year in improvements to its water distribution system. Last year approximately the same amount was spent. There has been a heavy wastage of water owing to defective pipe lines, and the company was continually making repairs to broken and leaky pipes, besides which there was considerable trouble from frozen pipes. Though the expenditure involves considerable additional capital, it is hoped that it will prove economical and that a saving will be effected in that more water will pass through the pipes instead of leaking away.

Here is a view of the value of the small town newspaper appearing in an American newspaper which has a circulation of over a million copies each issue. It is an effective answer to those who sometimes question the value of purely local advertising:

Paul Block, who owns several newspapers and understands their management, said at the Eckener luncheon to Jules Bache of Wall street.

"If Hearst would let somebody run his newspapers economically he could increase his net profits by ten million dollars a year."

That part of the newspaper business interests Hearst less than having his newspapers do things.

But, while a newspaper organization covering the country and possessing almost unlimited resources is important nationally, the public, and advertisers especially, should not underestimate the value of smaller newspapers, particularly the "country newspapers." Each is a public policeman and a source of information in its own locality.

Advertisers should remember that readers of country newspapers read every line, advertising included, and they buy everything from paint on the roof to cement in the cellar floor, from the separator in the kitchen to the daughter's silk stockings. The greatest influence on public opinion rests with the ten thousand country editors.

Ex-Premier Gardiner, of the former Liberal government in Saskatchewan, made an attempt to win over some of the Progressives and Independents, and failed. Therefore he handed his resignation to the Lieutenant-Governor of the province. One admires a fighter, but it seemed all along there was a very remote hope of Mr. Gardiner being able to win over sufficient support to carry on. His refusal to vacate office except on a vote of the house, following the election, was a bad move from a political standpoint, and served no purpose other than to further add to the disintegration of the Liberal party in Saskatchewan.

The fools we always have with us. Last week a young fellow was noticed driving a car, himself being the only occupant. He came through main street at a speed of probably forty miles an hour, disappeared at the west end, and in less than three minutes was back again, stopped his car at a cafe, and there it stood for over an hour. Another instance of being in a terrible hurry to get nowhere, and it is this type of "hare-brained" driver who causes trouble or injury to innocent people or little children. There must be something wrong with this type of driver. Drastic measures are needed to teach a lesson that will be long remembered.

Sir Henry Thornton, head of the Canadian National Railways, it is reported is asking for a raise of \$25,000, which will bring his salary to \$100,000 per annum. That makes us \$10,000 a year fellows feel like "pikers."

Announcement was recently made that Hon. W. L. Mackenzie King, premier of Canada, will make a tour of British Columbia later in this year. We will see Hon. R. B. Bennett's arguments for protection bombarded and sputtered, something like the counter-attack after you think you have won your position.

The way Dorothy Dix keeps her column going in the daily newspapers confirms the impression that women is never lost for words. Newspaper editors may ponder over subjects for editorial columns, but Dorothy just keeps pounding along with unfailing regularity, never missing a day.

### "Jim is Happy!"

Naturally, you will say—"Why?" The reason: Because he has finished paying for his home, and will now have more cash to invest in other directions. He might have continued paying rent during his lifetime. Instead, he has an asset which saves him money and gives comfort to his family. And it seems but a short time since he commenced payments on the place.

### You'd Like to be Happy, too!

I can tell you of as good opportunities as Jim took advantage of. The properties I have listed will give you an opportunity to purchase a home for a cash payment and the balance the same as paying rent.

### Call on Snowdon

and he will gladly discuss this with you. Think of the amount you pay in rent, and you'll quickly decide to find what opportunities still are available to own a home. It is worth the effort. Moreover, it is the SAFEST INVESTMENT anyone can make. Decide to call at the office of H. SNOWDON and find out more on how to

### Here and There

382. Canadian Pacific steamer Minnedosa recently brought over to Canada two fine stallions belonging to the Prince of Wales, "Aldibaran" an Arab, and "Crusader", a Clydesdale. They were brought to the Prince's ranch at Lethbridge, Alberta. The two horses broke their journeys at the Toronto Exhibition, and later were carried across the Dominion by Canadian Pacific Express. Special accommodation was provided for them in the Minnedosa.

Mr. Hon. L. C. M. S. Amery, secretary for the Dependencies in the Baldwin administration, fulfilled his wish recently when climbed Mount Amery, 10,894 feet, in the Rockies, to accomplish which he had travelled some six thousand miles by Canadian Pacific Express, Australia and thence to Lake Louise, from Edinburgh, Scotland, his way through blizzards and many other hardships to the top of the peak. He was accompanied by Mr. G. E. Peutz, a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan, Alberta.

"Mr. Churchill looks very funny working on one of father's threshing machines," said the Hon. George Rodney, aged ten, who with his younger brother John recently travelled to England to visit their father, Winston Churchill, a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan, Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Sacaguane, consisting of 43 square miles located in Carleton and York counties. This makes a total in all of about 600 square miles of territory set aside in the province as game sanctuaries since 1919.

Hon. J. L. Perron, Quebec minister of agriculture, has announced the loan of two-thirds of the purchase price of pure-bred sheep, which will be charged to Quebec farmers. He also plans to buy 25,000 pure-bred sheep throughout the province to bring in a yearly revenue of \$250,000.

A yield of 3,559,995 barrels of apples is expected in Canada this year, as compared with 3,329,974 in 1928. Comparing the number for the five-year average of 2,985,310 barrels this is an increase of 20%, making it a bumper crop.

Homestead entries in the four western provinces continue to run well ahead of last year. For the half year the number of entries compared with 5,165 in the same six months period of 1928. Alberta topped the list with 4,652 filings; Saskatchewan followed with 2,381; British Columbia recorded 371 and Manitoba 325.

Sixty-three wells are being drilled in the Turner Valley, 30 miles south-west of Calgary. 21 are just completed and 28 are producing crude oil with 24 barrels of oil—a total of 112 wells. Mr. Winston Churchill, on his recent trip across the country by Canadian Pacific, paid a special visit to the Turner Valley accompanied by Major Osborne of Calgary.

Selection is announced of John W. Dafos, Editor of the Winnipeg Free Press, to act as a commissioner on the part of the United States in the International Commission under the Treaty for the Advancement of Peace between the United States and Germany. Mr. Dafos was selected for this post by the United States Government acting through Hon. William Phillips, United States Minister to Canada. The international commission now being set up by the United States and Germany is to have five members, of which Mr. Dafos is the first to be appointed. The other four will be chosen by the United States and Germany after ordinary diplomatic proceedings have failed, are to be referred to the Commission.

Local business can be increased and developed by persistent effort and attention to details.

## "The More We are Together The Merrier We'll Be"

Thus goes the jolly song of the Good Fellowship Brotherhood. Plain simple folksy words, but much truth is embodied in them. Unless we hang together much community prosperity is lost to Coleman. Consider the printer; he is doing his part in helping along his home town by buying as much as possible there; yet much of the work he can handle goes outside.

No benefit is derived from giving work to outside firms who come around selling you printing. You pay as much for the work; you have to wait longer for it; you have no chance to examine it until the finished work comes along with the bill; and then there is the expressage to pay over and above the straight price.

Compare this with the service of the local printer. Show him what you want and he'll give you a definite price. You know exactly what the work will cost before it is touched. Then you can make minor changes, etc., before the final printing. Delivery is made promptly too—and nothing is charged for the service.

All in all you stand to gain by letting the local man handle your work. And do not forget that his active support is behind you and your business.

"For your friends are my friends,  
And my friends are your friends;  
The more we are together,  
The merrier we'll be."

## Aviators Had Hard Time

Had Almost Lost Hope When Rescued in Far North

After living eight days on berries between God's Lake and Norway House, where they made a forced landing, R. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

## Poet's Ashes Return Home

Bills Carman Laid To Rest In Family Plot At Fredericton, New Brunswick

The ashes of Bill Carman, who was Canada's greatest poet, now rest in a concrete tomb at the family burial plot at Forest Hill Cemetery, Fredericton, overlooking the city where he was born.

The ashes were brought from New Haven, Connecticut, where he died, to Fredericton, and committed to their last resting place following a service which was conducted by the Government of New Brunswick, and attended by distinguished men and women from many parts of Canada and the United States. One of Carman's best known poems was sung during the service at Christ Church Cathedral.

Vilhjalmur Stefansson, famous Arctic explorer declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 miles flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

## Making Amazing Progress

Use Of English Has Outstripped All Other Languages

The amazing growth of the English language, surpassing that of any other during the past 100 years, was illustrated by statistics compiled by a newspaper published at Zurich, Switzerland.

English was spoken by less than 20,000,000 persons in 1830, the statistics showed, while at present no less than 160,000,000 people speak it, namely, while an additional 60,000,000 understand it but do not consider it their native tongue.

The newspapers said that the rate of increase far outstripped all other languages and that there is no part of the world where the language is not spoken today.

## Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Haskovo District, of southern Bulgaria. Fire, smoke, lime and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

"Did you cancel all my engagements, as I told you, Smithers?"

"Yessir, but Lady Millicent didn't take it very well. She says you're to marry her next Monday!"

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

The ex-Kaiser is the richest German in the world. He found a way to make Germany pay before the Dawes plan was ever heard of.

## A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvelous woman mathematician has been discovered in the person of Nina Glagolova, 22 years old, who does in her mind, in two to 20 seconds, mathematical problems which require hours of experts to do in the ordinary way, with pencil and paper.

This young woman has been described after a wide survey, and scientists are amazed at her lightning-quick mental calculations. Before a commission consisting of Professor Korzenowski and Professor Chlebowski, mathematicians; Kolinsky, the engineer, and Dr. Kiselev, a physician, Miss Glagolova with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seem no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable, and she can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounced this woman of Russian birth, greater than Arago or other prodigies on record.

## May Make Icebergs Visible At Night

Expert Making Series Of Experiments To Ensure Safer Navigation

Dr. Howard T. Barnes, internationally known ice-engineering expert, was at McGill University for a few days while his experimental ship, "The Ulivia," was undergoing repairs and refitting before starting out for a series of experiments in the Bay of Fundy.

Dr. Barnes stated that he had just completed three weeks of experimental work in the detection of icebergs at night. In the vicinity of Newfoundland and Labrador, doing considerable photographic work for further experimental study in the laboratories at McGill.

To develop methods of making the icebergs visible at night is the objective of Dr. Barnes' present investigations. If he is successful, ships will be able to proceed at full speed either in darkness or fog in the vicinity of icebergs without danger of collision. This he hopes will make the St. Lawrence route to Europe even safer than at present.

## Petition For New Judicial District

Very Necessary To The Pas Say Members Of Bar Association

Members of the Pas Bar Association will petition the provincial government to make a new judicial district there comprising all the territory north of Township 44, in Manitoba, according to a decision made at a meeting of the baristers.

It was pointed out that it was of great importance to The Pas to have a judicial district. The lawyers do not ask that a resident judge be appointed, since the amount of work is not yet sufficient to make such a course necessary, but they do feel that, in the interests of the north a judicial district here is necessary.

When Breakfast Is Ready

Punch's famous advice to those about to get married has been equalized, we believe, by the American publication, "Life," which reports a husband as saying to his wife: "Well, I hear you scraping the toast, so I suppose breakfast is ready." —Toronto Mail and Empire.

First Traveller—I hear they aren't sending any more mail to Washington.

Second Traveller—How's that?

First Traveller—He's dead.

The human body generates enough heat during a day to melt 44 pounds of ice and raise the liquid to boiling point.

The average life of an oil field is about three years.

\* A butterfly in flight beats its wings nine times a second.

## TEACHING THE LAW OF GOD

Golden Text: "The opening of Thy words giveth light." —Psalm 119:130. Lesson: Nehemiah 8:1-18. Devotional Reading: Psalm 119:97-104.

## Explanations and Comments

The Reading of the Law by Ezra, verse 1-8. The first day of the seventh month is the day which from the time of Alexander the Great, has been set aside for the observance of the New Year's Day. On this day occurred the festival known as the Feast of Trumpets, which was observed by the Jews as a solemn day. Lev. 23:24, 25; Num. 29:1-6. In the year 445 B.C. on this day (Neh. 7:73), the people of Jerusalem assembled in the temple place before the water gate, and Ezra read the law and scribbled, to them the Book of the Law of Moses. In Ezra the title of "scribe" came to mean "the man of the book"; that is, the scribe who wrote the newest origin of the clergy of later times." —Dean Stanley. Exactly to what the phrase, the Book of the Law of Moses, refers is disputed. Some hold that it means the entire Pentateuch, some believe the legislative portions only of the Pentateuch, others maintain.

Ezra stood upon a wooden platform above the people and was able to read the Leviticus which gave the sense, so that the people understood the reading. Evidently Ezra read the Law sentence by sentence, and briefly, so that the people could follow him. The Levites made the explanation clear to the people. Men, women, and children, old enough to understand, listened attentively to the reading from early morning until midday. On account of the heat they had their temporary rest during the noon hour. To the end the people responded with Amen, Amen. (So it be with a reading of the Law.) Ezra concluded with the palms upward in supplication for the divine blessing, and then they bowed their heads and worshipped Jehovah with their faces to the ground.

The Effect of the Reading of the Law, verse 9. "By Ezra's inspiration and under his guidance the Law was read for the first time, but before the Jews in such a way as to convince them that it was the most important thing in the world that their lives should be conducted wholly in accordance with its precepts." —A. S. Pease.

Nehemiah the governor, Ezra the priest, and the Levites said to the people: "This day is holy unto your God, inasmuch as you have not wept." The day was holy because it was the day of the new moon and of the blowing of trumpets, and also because of the reading of the Law.

The People Rejoiced.

12. "Your wives eat the fat and drink the sweet," counselled Nehemiah using a proverbial expression meaning "Do not fast, mourn, weep, and pour out unto him for whom nothing is prepared."

New Means Of Solving Crime

Creator Of Sherlock Holmes Speaks Of Impressions Of Medals

In the well equipped police station of the future a trained clairvoyant would be part of the detective department, according to the creator of "Sherlock Holmes."

Sir Arthur Conan Doyle discussed the possibilities of a clairvoyant or a psychometrist helping in the solution of the Rothstein mystery and other puzzling cases confronting detectives throughout the world. He envisioned a day when criminals would have to destroy everything used in carrying out crime, otherwise a psychometrist would "sense" criminal and hand them to detectives.

"Although I do not think anyone could ever be convicted on the knowledge or evidence of a clairvoyant, I do believe the latter can find out where the police fail," Sir Arthur said.

"The proper term is psychometrist, 'the work having nothing to do with spiritism. It is purely a matter of the medium's own latent powers."

Sir Arthur gave as an example the finding of a blood-stained knife. The psychometrist, called to the scene, would inform the detective thus:

"I have a strong impression of a man with a long black mustache, wearing a brown suit."

According to Sir Arthur this would give the detective something to work on, as no matter how skilful the detective was, he could not have received an impression of the man's appearance from seeing the knife.

## To Study Empire Timber

With a view to finding new uses and new markets for the timber resources of the Empire, the Empire Marketing Board has decided to spend a considerable sum, not to exceed \$150,000, to be devoted to research on Empire timbers at the Princess Risborough Forest Products Research Laboratory, London, under the direction of the Department of Scientific and Industrial Research.

Germany, the United States, the United Kingdom and France together, exported \$800,000,000 worth of chemicals and allied products in 1928.

## Keep Your Farm Up-to-Date This Inexpensive Way

## For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the walls and ceilings—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

## Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold and heat that you can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and increased laying capacity of your flock.

## Utilizing Waste Space

Those messy, inaccessible waste spaces in your attic and basement are nothing to cover them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

No farm building, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

## Recipes For This Week

(By Betty Barclay)

## PATTY CAKE PIE

3 eggs.  
3 tablespoons lemon juice.  
1 teaspoon grated lemon rind.  
1 cup sugar.  
3 tablespoons flour.  
1/2 teaspoon salt.  
1/2 tablespoon melted butter.  
1/4 cup milk.

Beat egg yolks until thick and pale-coloured. Add lemon juice and rind. Mix sugar, flour and salt, and add to lemon mixture. Ghee or melted butter and milk and fold in stiffly beaten egg whites. Turn pie tin lined with crust and put into oven (450 degrees). After 10 minutes reduce heat to moderate (350 degrees) and continue baking 20 minutes longer, or until filling is firm.

## GRAPE PRESERVES

For each pound of Concord grapes, use one-half cup water. Wash and skin the grapes—sealing also if you can spare the time. Use sugar equal to one-half the weight of prepared fruit. Boil sugar and water ten minutes. Add the fruit, and cook until grapes are clear and the syrup thick. Then pour into hot, clean jars and seal.

More things come to those who don't wait for them than to those who do.

Oil of roses is distilled from buds gathered in the morning while the dew is still on them.

Martha—I thought you told me that you wouldn't give away that secret I told you last night.

Madge—I didn't give it away. I exchanged it for another one and an ice cream soda.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

## To Use Rocket Car

An attempt will be made to lower world automobile speed record at Ormond Beach, Fla., next spring, with a German Rocket car. The builders of the Rocket cars, Sander and Volkart, plan to use a car supplied with 64 Rockets instead of the 26 on the present car.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

## Investigating New Marketing System

## May Market Wheat In Europe On Basis Of Protein Content

Dr. Robert Newton, professor of crop crafts at the University of Alberta, has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of parliament.

Suggestion that such an investigation be undertaken was made by the agricultural committee of the House of Commons last session. The announcement which the work would be done by Dr. Newton, was made by Dr. H. M. Tory, at a session of a committee of the research council.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

## To Use Rocket Car

An attempt will be made to lower world automobile speed record at Ormond Beach, Fla., next spring, with a German Rocket car. The builders of the Rocket cars, Sander and Volkart, plan to use a car supplied with 64 Rockets instead of the 26 on the present car.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and son writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway producer. Al insists on helping Molly, the ballad singer at Blackie's, because he loves her. Molly sees him, the boy loves her and calls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without knowing it, is left behind. Many discs are sent to her by her. She accepts this first, but is reconciled after little Junior arrives. But when she returns to the stage she loses interest in the club. Her old friend John Perry, Al's best friend, is revived and one day Grace sees them riding in Molly's limousine. She also sees the man put his arm possessively about Molly.

### CHAPTER XII.

Night on Broadway. The richly dressed limousine crowds had left the theatres and were pouring into the fashionable night clubs. The electric signs on the night clubs blazed, beamed and beckoned. "Here," they seemed to say, "you may find succor from care, here you may eat, drink and be merry until dawn—if you have the price!"

Brightest among those insidiously beckoning lights was the brilliant sign of the CLUB BOMBO, where Al Stone was part owner and master of ceremonies. What a contrast to the shabby old place where he had once worked—Blackie Joe's. Al often thought of Blackie Joe's, and he longed to go back to hold his old one. Once he had been a mere singing waiter, eager for the tips that the none too affluent patrons of Blackie's place threw him when they happened to like his songs and his ad lib wise-cracking. Now he was using his fame as Broadway's foremost song writer to pull the shanks into his pocket at the Club Bombo. He was the magnet, the favorite of the big-time crowds. They called him the "Singing Fool" because he could put his songs over with such emotional intensity.

The ballroom of Al's club was expensive and expansive, designed to hold the huge crowds that flocked there. The tables spread across the room an army of round white tops, with a small cleared space in the middle for the cabaret performers and for dancing. One of the best jazz orchestras in the land furnished music from a raised platform at one side.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat. Take it for the Proven cure for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

**ASPIRIN**

Aspirin is a trademark registered in Canada

73

"You bet it does!" cried Molly vehemently, and almost bitterly. "I didn't think so I would never have let you come near me."

John Perry smiled. He knew the cool, calculating, ambitious Molly was mad about him. But he was mad about her, too. At first his interest had been the lightest of heart affairs, for he was a born philanderer, but gradually the situation had changed. To his own amazement a longing for Molly possessed him; now he found himself willing to dare anything to get her.

Suddenly she turned to him and said gravely, "What about my baby—what about Junior?"

But Perry had no answer to that; he merely shrugged his shoulders. He wanted Molly to himself, without any entanglements. Molly gave a tired smile and fixed her gaze on the broad back of the chauffeur, just ahead. How much did that man know of her interest in John?

Her unspoken words were cut short as Perry's arm went around her, and she felt herself drawn relentlessly toward him. In the dark compartment of the limousine her lips were pressed hard against his mouth; his arms wound around her waist. She forgot Al and Junior, forgot her ambitions, forgot everything but the passionate embrace of the man who held her. She relaxed for a thrilling moment and smiled into the eyes only a few inches from her own. Then she pulled herself abruptly away, for the car was approaching the Club Bombo.

She quickly snatched a jeweled compact from tiny bag, gazed at herself in the mirror, patted her disarranged hair back into shape. Her rouged lips had been smeared, so she seized Perry's handkerchief, gently wiping off the excess rouge. Meanwhile, the racketeer gazed at her admiringly and brushed her hair with his coat lapel. "You've mussed me terribly."

"Sorry," whispered the imperturbable Perry.

The chauffeur swung open the limousine door and Molly stepped out. Straight ahead she saw Al in the night club doorway, smiling at her expectantly.

(To Be Continued.)

### Farm Incomes Higher

Average Increased By Seventy-Five Dollars In Year

The average cash income per farm home in the Provinces of Manitoba, Saskatchewan and Alberta last year was \$2,344, exclusive of the value of seed, feed, meat vegetables and other commodities produced and retained by the farmer for his own requirements. This is an increase of \$75 per home over the previous year.

The Oil Of The People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of action every year. Its healing qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and we need no other preparation.

### Frequent Test Essential

That a man has passed a driving test with flying colours does not mean that he could pass the same test successfully ten years thereafter. In the interval he might have suffered all sorts of illnesses and have acquired more defects which gravely affected his qualifications as a motor vehicle operator.

Ex-Kaiser Wilhelm is still the wealthiest German, his estate being estimated at 500,000,000 gold marks, approximately \$19,000,000.

People like to trade with a going concern provided it isn't going backwards.

### A Friend to Women

Has Greatest Number Of Miles Of Airways In Operation

The United States leads in civil air transportation so far as mail carried and the number of miles flown are concerned, but Germany is ahead of the rest of the world in miles of airways in operation, number of passengers carried, in commercial mileage per aeroplane, and also in pounds of express and freight carried. Canada comes second in number of passengers carried with 74,689, and is third in express and freight. The figures are for 1928.

"Land sakes there, Mary! What's all that noise in the kitchen?"

"You don't expect me to break three platters and two cups without making a noise, do you?"

"Nonse, Molly!" exclaimed Perry. "You're a star in your own right. Besides, is fame everything? Doesn't love count for something?"

### Requires Aid Of People

If Timber Resources Of Empire Are To Be Preserved

The London Times has issued a warning which should be noticed throughout the British Empire. It declares that the enormous timber resources of the Empire are rapidly wasting away. Further than that, it says that unless an end is put to extravagant waste, and new timber reserves created in suitable areas, the day must inevitably come when the world's supplies will prove unequal to the demand. Indeed, the opinion has been expressed by competent authorities that this day is not very far off. The life of the people is required in this matter; for if the farmers would take advantage in Canada of the free offers of young trees for plantations, it would help enormously, and why should not municipalities do so too, and earn revenues? One wonders, too, why thousands of acres of waste land in Great Britain are not used for reforestation purposes. This would provide employment for the unemployed and wealth for posterity.

### An Amazing Project

Plan To Make Inland Sea In Sahara Is Feasible

Ancient prophecies may be fulfilled if a project declared feasible by engineers is carried out. It involves making a vast inland sea in the Sahara, and that would be accomplished by digging a canal which would begin about twenty-five miles from Biskra and run out to the Gulf of Gabes. In Algeria, it would be 210 miles wide, with thirty-nine miles per 170 miles long. It would connect the eight short (shallow saline lakes) that exist in that region, and would transform it into a vast interior sea having a surface of 14,000 square miles.

### France Sending Immigrants To Canada

Arrival Of First Actual Settlers From France In Many Years

Heralding the arrival later, of more than twenty families who are to come direct from France to settle on farm land in Canada, two families comprising some dozen souls reached Montreal, by the Cunarder "Ascania," to settle under the auspices of the Canadian Colonization Department of the Canadian National Railways.

The two families who arrived are the first actual settlers to come from France to Canada in many years, and they are merely the forerunners of other families who will come out next spring.

### The First Alarm Clock

It comes as a surprise to find that alarm clock appeared more than three thousand years ago. A beautiful timepiece made in Germany, about 1600, indicated the time on a great horizontal face, while the movement of the hand served to strike an alarm. The owners of this remarkable clock must have overseen frequently for the mechanism was far from reliable.

### Stop Colds with Minard's Liniment

Physician—I'm dead. Victim—I'm not dead. Policeman—Shut up! You are. The doctor knows best!

The First Alarm Clock

A Cherry tree at Salem, Oregon, known to be over 70 years old, has produced 1,157 pounds of cherries this year, bringing a total of \$15,70. The tree is ten feet around the base and the body sound, according to R. E. Shin, who has been caring for it.

### A Fruitful Cherry Tree

"Baby's Own Tablets are the best remedy in the world for little ones. My baby never terribly ill, and when the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail order, 25 cents a box, from the Dr. Williams' Medicine Co., Brockville, Ont.

### Personal and Local

The Junior W. A. of St. Alban's church will hold a pantry sale and tea on Sat. Feb. 14 in the parish hall.

Miss Eleanor Nielsen, a former high school pupil, has been accepted as a nurse-in-training at Calgary general hospital, and expects to leave shortly.

Lieu Billyard, of the Salvation Army, Grace Hospital staff, Vancouver, was here this week, visiting with Mrs. R. Holmes. She stopped off here on the way back from her home at Yorkton, Sask.

Dave Gillespie and M. J. White are the delegates from Coleman attending the fourth annual convention of the United Mine Workers of Canada being held this week in Calgary.

Blairmore golf course was well patronized on Wednesday afternoon, when quite a number of ladies as well as gentlemen were out playing. The fine days are being made good use of.

Palace theatre has an exceptionally good program for the weekend. The leading feature is "Submarine," and there will also be shown the popular Fox Weekly News and a sparkling comedy. You'll enjoy this show on Friday and Saturday. Palace always shows the best pictures.

The West Canadian Colliers Band of Bellevue was given a very good write up in the Coal Review, published in Winnipeg, on its trip to Calgary during Stampede week. A float was also entered by West Canadian Co., carrying a block of coal weighing over a ton, with miners grouped around it with their tools and mining lamps. The float attracted a great deal of attention in the parade.

Fine September weather is being taken full advantage of by the tennis players, who are making good use of the courts.

The spreading of paint goes merrily on. George Graham reports that he has plenty of work in sight, enough to keep him going for a considerable time to come.

Andrew Dow was a visitor to Calgary and various towns in the province, looking over the various types of "talkin" equipment installed in theatres, with a view towards installation here at a later date.

Mr. Peet returned from Edmonton on Friday, after being in hospital for a week as a result of a truck striking the auto which her husband was driving while on a holiday visit to the city. She was badly bruised and suffered from shock. Mr. Peet and the two little sons escaped injury.

Mrs. W. Fraser was taken to the hospital on Monday morning, suffering from what is thought to be a broken blood vessel. She has been in poor health for some time, and on Sunday was taken with acute pains, so that it was deemed advisable to remove her to hospital on Monday.

Read the grocery stores advertisements in this paper. The specials offered enable you to make quite a saving on your weekly bills, and many have found that it pays to study the weekly advts. of the stores which advertise their goods. You also obtain goods of known quality and reputation and this is far better than buying unadvertised brands. The thrifty and wise housewife studies the ads.

Coleman Miners Hospital Board  
**TENDERS**
